

# Solutions for Missing DLL Errors During Demo Runtime

## Issue Description

When running the demo, the following errors may occur:

1. "VCRUNTIME140D.dll is missing. Reinstalling the program may fix this problem."
2. "MSVCP140D.dll is missing. Reinstalling the program may fix this problem."
3. "ucrtbased.dll is missing. Reinstalling the program may fix this problem."

These errors occur because some system versions do not include these dynamic link libraries (DLLs) by default during installation.

Example error message:

## Resolution Steps

1. Open the U Disk and navigate to the folder: **9\_External Module-->Missing DLLs**

### 2. For System32 DLLs:

Copy the DLL files from the **System32** folder to the following directory on the C drive:

**C:\Windows\System32**

### 2. For SysWOW64 DLLs:

Manually copy the DLL files from the **SysWOW64** folder to the following directory on the C drive:

**C:\Windows\SysWOW64**
